

姓名: Name:	王易乔 Yiqiao Wang	性别: Sex:	女 Female
国家: Nationality:	中国 China		
职业: Occupation:	学生 Student		
就读学校: Name of School /Affiliation:	Gallaudet University		
学历: Education:	Gallaudet University		
自传: Statement of Purpose:	<p>What are my plans after graduating from Gallaudet University? My goal is to build the confidence of the deaf people by teaching them that they too can improve themselves through good education because I still believe what I learn from Gallaudet will be of enormous benefit to them.</p> <p>I am willing to teach them how to setup and develop helpful websites, build and maintain databases and other practical and useful professional skills. They can also communicate with one another and with other people through such electronic communication means, instead of through sign language alone. I hope I insistently pursue this goal, let normal hearing people recognize that deaf people can also make valuable contributions and significant impact to the whole society just like normal hearing people do.</p> <p>At that time, I am taking volunteering job at Chinese Bible Church of Maryland. I am teaching two sign class both American Sign Language and Chinese Sign Language to hearing students and</p>		

explain them about the deaf culture. I make endeavors to build a bridge between the deaf and the hearing when I already are walking on this reliable road, also mention my knowledge to design website of non-profit organizations; Agape Love Deaf International (ALDI).

I still believe that for our (people who are deaf) ability is equal to that of people with normal hearing. The only difference is that we cannot hear.

I should be using the scholarship in my academic needs such as textbooks, software, tapes of video and other fee obligations. I sincerely wish its helpful effect to develop my professional skills on visual community systems for the deaf in digital media. I would like to plan to join NTID/RIT Deaf Themed literary Contest about Deaf experience in the deaf community. Moreover, they require submission by Video and DVD. So that I think I could use it to put in the useful material. As you see, in the high- tech society, exiting, visual protections continue to impact the deaf community in new technology, and that influence the development of the communication with deaf people. Thus, I have to improve my area to pursue my dream focus on visual media. Also, I am willing to share with others to understand the amazing, visual deaf culture.
